

Program for encouraging research and development activities in the field of climate change (Call for Proposals: PKP-06-2016) Additional Criteria (final evaluation)

Evaluation panel should give final opinion for each project proposal (which will be sent to the applicant). The final opinion should include the following elements:

Please write your critical opinion on the overall strengths and weaknesses of the project proposal, especially regarding the importance and scientific quality of proposed project, principal investigator and research group. To what extent does the project proposal correspond to the expected research objectives mentioned in the Call for proposals?

Please write a short explanation.

Institutional support

Does the institution provide a stimulating research environment, necessary infrastructure and other conditions for the project proposal implementation?

Is the institutional support concrete?

Do you consider that the institutional support could be more substantial?

Please write a short explanation.

Financial plan

Are all items justifiable and necessary in the context of implementation of the specific research (do they justify all the project requirements)?

Are the provided amounts adequate, underestimated or overestimated?

Please write a detailed explanation for all items and amounts.

Ethical issues

Does the project include any ethical issues or concerns? Are there any other issues that should be addressed (e.g. potential hazards, whether the results could be misused in relation to humans, animals or the environment)? If so, do the applicants offer satisfactory solutions/insurances?

Please write a short explanation.

FINAL OPINION AND RECOMMENDATION

Please write a final opinion on the project proposal.

Recommendation:

A – Project proposal meets required criteria and is recommended for funding.

B – Project proposal meets part of the required criteria or needs certain changes. We do not propose funding the project proposal in this form.
